

LIFE SAVING AFRICA RESCUERS.

COMPANY PROFILE.

ABOUT US.

SINCE 3RD JULY 2017

Lifesaving Africa Rescuers is an accredited body that offers, lifesaving courses, scuba diving course, first aid course, pool management course, instructor course, flood safety and flood rescue course.

For over 4 years lifesaving Africa rescuers has been in partnership with Kenya lifesaving federation and has been training in these courses. In Kenya the courses are recognized by relevant authorities, and we anticipate that Kenyans will progress through lifesaving Africa rescuers courses.

We strive towards

AIMS & OBJECTIVES

- ✓ To serve Kenya in aquatic field.
- ✓ To prevent drowning to the best of our abilities
- ✓ To teach lifesaving and establish educational exchanges of aquatic lifesaving techniques and operations.
- ✓ To promote uniformity concerning equipment, information symbols as laws and regulations in aquatic environment.
- ✓ To make Kenya a drowning free nation

MOTTO

Targeting 0% drowning

Lifesaving Africa Rescuers would like to build partnership across board training and refreshing lifeguards, first aid course, learn to swim, scuba diving, swimming pool management & instructors course. Our country has become a victim of floods and drowning thus experiencing them often.

In building partnership and joining our lifesaving course will expose everyone in learning modern rescue techniques in all the water related activities that will facilitate the welfare of Kenyans that live, work and travel around water bodies. Lifesaving Africa Rescuers is a full member of Kenya lifesaving federation where lifesaving syllabus has been developed following the continued affiliation with international. Lifesaving federation (ILS). Royal lifesaving society (RLSS) (CMAS) and international federation of swimming teachers association (IFSTA).

In 2014 World health Organization (WHO) released a global drowning report terming it as a health issue and leading killer that has been neglected. Following this we presented a drowning data in Potsdam Germany in 2012 and Penang Malaysia in 2015. In Our new efforts of partnering we are hoping the number of drowning victims will have gone down in the next world conference on drowning prevention in Vancouver Canada and many more to come. If we would join hands we are assured victory towards this monster that has continued degrading our country.

Over the years we have been very active in drowning prevention strategies i.e. world conferences on drowning prevention, survival swimming programs, survival schemes programs, flood safety/ flood rescue programs and swimming galas and lifesaving galas.

We appeal to everyone to move into a new era of fostering co-operation, collaboration and build partnership complementing each other as this paradigm shift will go a long way in the promotion of water safety and overall lifesaving development in Kenya via joint involvement and partnership, we can develop necessary interventions to reduce drowning mortality with increased knowledge in rescue skills, while at the same time promote healthy lifestyle and responsible citizens.

See the course outline program.
